

Technical Data Sheet of Polyethylene

RECYCLING

EKOPE PCR-F

Description

EKOPE PCR-F is Recycled Polyethylene produced as a result of washing and cleaning of consumer wastes.

Application

- * Shrink
- * Heavy duty bags
- * Bundle
- * Non Food PE films

Caution

- * Not suitable for food packaging.
- * May contain slip, antiblock and antioxidant.

Physical Properties

Property	Typical Value	Test Method
Density (g/cm ³)	0,920 - 0,925	ISO 1183
MFI (g/10 mins.)	0,5 – 1,3	ISO 1133
Bulk Density (g/l)	500	ISO 66/77

Processing Techniques

It is easily processed in Blown extruders.
Melting temperatures are between 160 - 195 °C

Storage

It should be stacked under 50 °C and protected from sunlight
Humidity and moisture in the storage area may cause physical, odor and color changes in the product.

Appearance Property

There can be some small plastic substances which do not come from standard PE in the granules. These small particles can appear as black small grains (carbon deposits) in the material. There will be color changes and inclusions on the final product, it varies from batch to batch (but you can also see it within one and the same batch). The variation comes from the base material / granules which naturally have a certain color difference.

Safety

The product is not classified as dangerous.

Technical Data Sheet of Polyethylene

Recycling

The product can be recycled using crushing and washing methods. Recycled polyethylene is not as clear as virgin polyethylene.
